Review 2024

Successes in 2024

Paralympische Spiele 2014 in Paris: Doppel-Gold Grade III

Paralympische Spiele 2014 in Paris: Doppel-Gold Grade III

New developments

Breeding

New developments

Hannoveraner Dressage Horse Breeding Program (PHD)

- Analogous to the Jumper Breeding Program
- But no basic population like in the JBP yet (4 gen. of jumper pedigree)
- Three categories * /** / ***

New developments

Hannoveraner Dressage Horse Breeding Program (PHD)

A star * is awarded on the basis of the mare's own performance in the mare performance test, the sport test or the Hannoveraner Riding Horse Championships

- In the mare performance test, the average for basic gaits must be at least 7.67 and the average for rideability at least 7.75
- Participation in the final of the Hannoveraner Riding Horse Championships

New developments

Hannoveraner Dressage Horse Breeding Program (PHD)

**A two-star rating ** is awarded on the basis of own performance in competition.
Own competition successes:**

- Three placings in medium* level dressage tests or higher
- Qualification for the Bundeschampionat/World Championships for Young Dressage Horses
- Placing in final of the Hannoveraner Dressage Horse Championships

New developments

Hannoveraner Dressage Horse Breeding Program (PHD)

A three-star * classification is awarded on the basis of successful offspring in competition. Two offspring with one of the following successes each are required:**

- One offspring with qualification for the Bundeschampionat/World Championships for Young Dressage Horses
- One offspring with a placing in the final of the Hannoveraner Dressage Horse Championships
- One offspring with a placing in at least one advanced (S) level dressage test or higher

New developments

Additional premium „Exterieur +“

- The Hanoverian premium for mares can be supplemented by the title Exterieur+ (Ext.+)
 - This premium supplement is awarded exclusively to premium awarded mares at mare shows and MPT's
- The aim is to highlight the mares among the Hanoverian premium mares that stand out positively in the construction of their body and foundation (neck, back, croup, limbs, hooves)

New developments

Statement OPU / ICSI

- The breeding committee of the Hannoveraner Verband has been intensively involved with OPU/ICSI biotechnology and has received scientific/veterinary advice on the subject
 - Weighing up the breeding possibilities, which cannot yet be conclusively assessed, and the risks for the mare, the Hannoveraner Verband is of the opinion that embryo transfer as a way of increasing the number of foals from particularly valuable mares is in any case preferable to OPU/ICSI
- OPU/ICSI should only be used if pregnancy cannot be achieved by means of a conventional embryo transfer**

New developments

Stallion performance test

Change into Multi-level points system as of January 2025

- First stallion tests on station in 1926 in Georgenbug and 1927 in Westercelle
- Few fundamental reforms in the first 80 years
- Three extensive reforms in the last 20 years

→ **The claim: A concept that is sustainable in the long term. Design basic flexibility in such a way that adjustments are possible without calling the basic concept into question**

New developments

Stallion performance test

Change into Multi-level points system as of January 2025

→ More focus on sport /competition classes

→ Stallions can collect points for provisional or fully approval in stallion book I
in various ways

New developments

Stallion performance test

The following levels are provided for:

- 0 points - provisional registration in SB I as a 3-year-old stallion with a positive licensing decision
- 4 points - provisional registration in SB I as a 4-year-old stallion
- 8 points - provisional registration in SB I as a 5-year-old stallion
- 10 points - final registration in SB I

New developments

Stallion performance test

Therefore the following testing forms are available (in Germany):

- 50 day test
- Ability test (short)
- Competition results
- **NEW: „HLP“ – competitions:**
Stallion competitions (not necessarily only for stallions)
on the Societies Championships like the „Hannoveraner Championat“

Stallion performance test - Summary

- A stallion must collect 10 points for full approval
- This total is achieved by passing a 50-day stallion performance test on station
- Depending on age, points can also be collected in the ability test (3 and 4-year-olds) or the newly designed “HLP competition” tests
- Furthermore, the performance can also be achieved (depending on age) in competition sport f.e. 5-year olds: 1 point for one placing in dressage tests in 2nd level. Qualifications to Bundeschampionate/WCYH still valid
- Test forms can be combined with each other

Pioneering abroad

- German District Societies decided to also award premiums to foals in 2024
- Medals similar to the International „Gold Medal“ given by District Society Hannoveraner International
- Hannoveraner International introduced the Gold Medal in 2018
